Morgan Smith [REDACTED]

Around 1:15 Adventure 60 called for an offload and a black shirt (mechanic). Around 1:20 PM he said over the aviation radio that he couldn't make the pads. At that time I saw grey smoke coming from behind and below the helicopter and he landed in the field. After the landing I ordered the loaders to get the customers and pilots away from the helicopter. Everyone walked away unharmed.

Stephen Skribiski [REDACTED]

While on a "Fly for Fun" ride, I heard a black shirt call. Eventually saw a helicopter coming into land trailing white smoke. I continued my route. Upon arrival of our entry point to the pads, I saw the helicopter set down in our field behind the pad. I performed a "go around" so they could get everyone unloaded and away. Once safe, I came back and landed on PAD 5.

Vishal Saraswal (James [REDACTED])

I was loading/unloading on Pad2, and heard a black shirt (mechanic) call. Minutes later, I saw the helicopter coming down from the corner (fat) pole with a trail of smoke. All I could see was the approach and not termination as it was directly behind me.
