"Airworthy" means an aircraft (and component parts) conforms to its type design AND is in condition for safe operation. (References: Public Law 103-272, Section 44704, FAR 3.5, FAR 21.31, FAR 21.41, FAR 21.183, AC43.13-1B glossary, FAA Form 8100-2)

Fellow airmen: This general checklist is a living document and references were current at the time of this revision. It was not developed or intended to be an 'end-all' checklist for flight planning purposes. The purpose of this checklist list is to aid the airman and to increase industry awareness of the associated responsibilities with the term "airworthy". The decision to accept an aircraft in its' present condition rests with the Pilot-In-Command. Constructive criticism of this content is welcome and encouraged. At least then we know you are putting some thought into the matter.
