Date: Wednesday, October 4, 2017 11:38:32 AM

Brian,

Here's a picture of the fuel that we recovered from the gascalator. I ran out of large jars so we drained it into two jars. The one on the right was the first one we filled and it appears to be all water. The one on the left has both fuel and water. We should be able to run it this afternoon or tomorrow. I will let you know before I run it.
