

NTSB RECORD OF CONVERSATION

Brian C. Rayner
Senior Air Safety Investigator
Eastern Region

Date: 2/6/2019
Person Interviewed: Gabriel Anudson
NTSB Accident Number: ERA18FA022

Mr. Anudson was deer hunting in a tree stand when his attention was drawn to the sound of the airplane. He watched the airplane appear out of the clouds and witnessed the accident. Mr. Anudson was interviewed by telephone, and the following is his summary of events.

- “You could hear the engine cutting in and out real bad and when it came into view it went into a spin and there was a loud pop and then it just blew apart. I heard it in the air a long time before I saw it. It sounded like it was struggling. It was so low there were no individual clouds, it was just solid fog. The airplane was about 300-400 feet when it appeared out of the clouds. He shouldn’t have been flying in that, you couldn’t see nothing. It was a great day for deer hunting, but not a good day for flying.”
