NARRATIVE

On November 29, 2017 at approximately 1155 hours (EST) I spoke with Amy Foster, wife of Scott Foster, at the request of Detective Michael May. This interview was conducted via telephone with a list of subject questions provided to me by Detective May.

Mrs. Foster stated her husband did not have any pre-existing medical or mental issues and did not take any medication, prescribed or otherwise. She stated her husband, son, Doug Whitaker and Kyle Stewart departed from the Somerset, KY airport on Friday, November 10, 2017 and landed at their destination in Tennessee at 0825 hours (EST). She advised she did not know the time they left Somerset, KY but Scott text her at 0825 hours saying, "made it safe and sound". Mrs. Foster stated the last text she received from her husband was on Sunday, November 12, 2017 at 1321 hours (EST) saying, "headed to the airport", implying the airport they were departing from in Tennessee. Mrs. Foster stated their plan was to leave Somerset on November 10, 2017 and return on November 12, 2017. Mrs. Foster was asked about them returning for Doug Whitaker's birthday party that evening but she stated Scott had not recently mentioned it to her and she thought it had been called off because Mr. Whitaker did not like "surprises". Mrs. Foster did not learn the party was still planned until she received a call from Mr. Whitaker's wife on Sunday, November 12, 2017 around 1700 hours.

Mrs. Foster did not have much information about Scott's flying experience or hours, but stated he was very careful and meticulous. She stated he received his training at a school in Somerset, KY in 2014, but she was unsure of the name of the school. She believed his first solo flight was in December of 2014.

Mrs. Foster did express concerns over the release of the preliminary report and believed certain aspects were false or misleading. Mrs. Foster stated Scott always checked weather conditions prior to flying and used "Foreflight" which was constantly streaming to his iPad while he was flying to stay updated on the weather conditions. Mrs. Foster stated she received his iPad from officials after the crash so she believed he was aware of the weather conditions. Mrs. Foster also believed there should be radio transmissions just prior to the crash because she received a phone call a few days after the crash from another pilot saying he heard the transmission of Mr. Foster stating "they were going down". Mrs. Foster stated she has the pilot's information if investigators would like to speak with him.

I provided Mrs. Foster the contact information for Detective May and advised her to contact him with further questions since he has more information regarding this investigation.
