Date Report Received

1/4/2018

I flew Mr. and Mrs. Gast from KPNS to KPIE the morning of 11/25/17, departing at approximately 0830. The flight was on an IFR flight plan. The weather was excellent and the flight was uneventful. We arrived at Signature FBO, where the Gasts got transportation home, while I had the aircraft topped off for the return to KPNS. I watched the ground crew fuel the aircraft from a distance and during preflight checked the fill and caps.

Pre-start, taxi and takeoff checklists were done in order. Engine start was normal and all pre-takeoff checks and runups were normal. I was cleared for takeoff on rwy 36 at approximately 1330.

It was a perfect day to fly. Takeoff roll was normal until gear retraction at about 50-100 feet. Upon gear retraction, the torque immediately spooled back dramatically, probably to 300-400. RPM was a solid 2000 rpm. The torque then surged back toward full power, but I'm not sure how high. I knew I needed to make a decision fast and made about a 20 degree turn right in anticipation of a teardrop return to the runway. I think the engine may have been surging at this point, but I really do not remember. I was looking at the water off the end of rwy 36, and did not really want to land in the water as this aircraft is extremely difficult to get out of in a hurry. I made a hard left turn to get pointed back at the runway, using all available airspeed and altitude. I think I was hoping that the engine would surge and keep me aloft for just a few more seconds. Apparently it did not and I hit the ground in a slight nose down, left wing down, attitude. I did not expect to live.

When the dust settled, I regained my wits...my bloody left hand told me I was still around, and I proceeded to unfasten my safety belt, and maneuver myself toward the rear exit. I think I turned off the battery, and maybe the firewall fuel valve, but cannot say for certain. I crawled out the rear entrance door, which operated normally, and was on the ground when the crash crew arrived. I was shaken and in pain, but alert. I received excellent care from all involved.

From what I remember, the aircraft was largely intact, but the left wing was separated from the fuselage. The propeller and engine were smashed, and the cabin interior appeared to be intact. The location, as I remember it, was east of the rwy 36 about 200 -300 yards. The aircraft was pointed at the runway. There was no fire.
