7 AA...

March 23, 5:30-6:00 PM I flew the 180 for a fifteen to twenty minute stroll down the Big Black River north of my private strip @ 2,000' msl and upon my return experienced carb ice that brought the engine to a very rough idel and I could not get the engine to recover.

@ 2,000'... pulled the flaps one notch @ 120 kts and in the same motion pulled the carb heat and lost approx 500 @ 1,500 put the plane in a full slip that resulted in an excessive speed with 5-7 knots of tail wind and I made the decision that I could not stop mid way down the run way -

I was able to get over the trees and of strip but the tree line before an open field some 300- to 500 feet was unavoidable. a very quick response between two mature oak trees flared the plane and full flaps the very last seconds resulted in a full stall and a thrill I hope I never experience again - Thanks to the Lord, many hrs with great instructors and guidance of The FAA I miraculously walked away without a scratch.

Many Thanks for your guidance and professional help -
