

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Vero Beach State: FL

ZIP: 32960 Country: USA

Latitude: 27.6556N Longitude: 80.4179W

(Enter in decimal degrees or degrees-minutes-seconds)

Accident/Incident Date/Time

Date: 06/17/2018 Local Time: app. 11:30 a.m.

mm/dd/yyyy

Time Zone: Eastern

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N8674Y

Manufacturer: Piper

Model: PA-30C

Serial Number: PA30-1818

Year of Manufacture: 1969

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 3725 lbs

Weight at Time of Accident/Incident: 3325 lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: 0 Passenger Seats: 2

Number of Engines: 2

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
- ☐ Aerobatic
- ☐ Balloon
- ☐ Commuter

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft sustained damage to the nose of the fuselage, bent propellers on both engines, small area of skin abrasion on the right underbelly, speed fairings were abraded at the trailing edge of the wing, and mechanics are inspecting for further damage.

No damage to property other than the aircraft.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the morning of June 17, 2018 my wife and I departed VRB for a local area flight to tour the beaches from the air. Preflight evaluation of the aircraft was performed per checklist prior to startup and no abnormalities were noted. Startup was routine, the ATIS was obtained and we were cleared to taxi to Runway 4. Run-up was performed uneventfully per checklist and takeoff checklist was completed. Clearance for takeoff VFR was obtained and conducted without incident. We departed to the East and then made our way north towards Melbourne. We made a 180 degree course reversal outside of the Melbourne airspace and proceeded South just over the Atlantic Ocean along the coast. Between Stuart and Fort Pierce we again reversed course and headed north. The descent checklist was completed and ATIS at VRB obtained. I made contact with the Vero Beach tower as I turned Westbound. I did this just North of the Fort Pierce airspace. I descended to approximately 1200 ft and was given instruction to enter a right base for runway 4 by the tower. I was then alerted about the presence of a Pilatus ahead of me and I made the decision to lower the landing gear to slow my air speed. At this point I did my 1st GUMPS check. The gear actuator was in the down position and the light indicated green. I checked on the reflective mirror on the left engine nacelle and verified visually the nose gear being in the down position. My wife asked about the landing gear as I called out the GUMPS and I explained to her that undercarriage meant landing gear. I then pointed to the green down light and had her look at the gear through the nacelle mirror, also. We then turned on to final and were given our landing clearance. Flaps were set to 50% and I advanced the prop speed to full forward and a final GUMPS check was undertaken and verified prior to landing. We landed in the vicinity of the touchdown markers. I said to my wife "not my best landing, but certainly not my worst". She responded, "that was not bad at all", and at that point the nose of the plane dropped and we began sliding down the runway on the nose of the aircraft. This occurred just north of taxiway A1. The right wing began to settle towards the runway as we came to a stop between taxiway C and Runway 12R/30L. There was smoke inside the cockpit as we exited the aircraft, but no fire. The airport fire department and rescue squad presented to the scene and neither my wife nor I sustained any injuries. The paramedics verified stable blood pressure and did not recommend transport to the hospital. I then contacted Corporate Air, the FBO where the airplane is kept. The airport manager contacted the FAA and I spoke with the investigator, Mr. Best. Approval to move the aircraft was obtained. Inspection of the Runway 4 demonstrated no significant damage to the runway or no damage to lighting, as the aircraft stayed on center line until just prior to coming to a halt approximately 20 feet to the right of centerline. Superficial scrape marks were noted up to the airplane. A crane obtained by the FBO then transported the aircraft to the maintenance hangar.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

I am not aware of what caused the nosegear to collapse. If I had placed more judicious backpressure upon the yoke, I may have transferred more load to the main landing gear, decreasing stress to the nosegear.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Nose gear collapsed on rollout. Uncertain etiology at this time.
