Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Upon arriving at the airport I took on approximately 7 gallons of 100LL from the fuel truck dispatched from the terminal in order to top off the tanks. I completed my sump of three locations, concluding my preflight inspections, and did a final walk around before tugging the plane out on the ramp. Mary and I loaded the baggage; I closed the hangar door and did another walk around before climbing aboard.

Once I went through my prestart procedures and idled to warm the oil I picked up the current AWOS. Winds favored runway three-two. I transferred my flight plan to the Garmin 530/430 via the iPad and the flightstream 210. We taxied out and I completed my instrument checks then at the hold short line, set up the radio to contact clearance delivery for my IFR clearance.

I performed my run up, per the checklist, and everything was fine. Doubled checked the cabin door and our lap belts. I then contacted clearance delivery for my IFR clearance. I was cleared to KPSK and my assigned altitude was three thousand, expect eight thousand. On departure I was to fly a heading of 270.

I switched back to KOXB CTAF and checked the pattern for traffic, it was clear. I announced my departure, checked for traffic on final again and rolled for the runway. I increased power, 45Yankee responded and we were on our way. Gauges were all good; we lifted off around 7-8 hundred feet well short of the three thousand remaining sign, as usual. We climbed out and once clearing the end of the runway I retracted the gear, moved my right hand from the gear selector control and back to the throttle. MP and RPM check was good. When I returned to my scan the plane started to vibrate, like something was coming apart, I checked throttle and prop settings but the plane was losing power and the vibration increased. I could hardly keep the nose up and could not see my pre-planned go-to spot straight ahead. I immediately went to plan B and that was turn back towards the airport and golf courses just south. I maintained airspeed by lowering the nose as I turned to my left. I struggled to keep level and complete the turn. I briefly had the cross runway 2-20 in view over the line of trees. I made my emergency call to KOXB traffic. I could not keep 45Yankee flying and the runway disappeared behind the trees so I went for the fairway straight ahead. I made a second call that we were not going to make it back to the airport. I did not extend the gear, deciding to belly it in on the fairway. I feared sticking the gear and flipping and being trapped.

The next thing I remember is Mary's voice saying she could not open the door and there is smoke in the cockpit. I opened the door and Mary got out, I could not get myself out with my broken leg and due to the head blow my world was spinning. A man was pulling me out, telling me the plane was on fire and I pushed with my left leg while he dragged me on to the wing. The man asked if I could walk, I could not, so he rolled me away from the plane. I heard Mary's voice over all the noise telling people where the fire extinguisher was and that the plane was full of fuel. After that I remember a man asking me questions while I was on a helicopter. I asked about Mary multiple times and he said she was fine headed to the hospital.
