On September 08, 2018, about 1045 EDT, A Cessna CE-152, N6964P serial NO. 15285019 departed Palatka Municipal-LT Kay Larkin Airport (28J) in-rout to Ormond Beach Airport (ORM). The aircraft performed an emergency landing in a field at Smith Farms in the 9200 Block of County Road 13 South in Hasting, ST Johns Count due to rough running engine.

N6964P is registered to Sunrise Aviation INC. located at 740 Airport road, Ormond Beach FL. The wings were removed and the aircraft was repositioned to Ormond Beach were further inspection can be conducted.

The inspection reviled the nose landing gear was torn off the airframe causing the cockpit floor and firewall to buckle. The aircraft came to rest upside down, the right leading edge smashed into the debris causing the outboard spar to crumple.

I inspected the operation of each engine-related controls as applicable. I made certain that each control has full limit of travel, and that no binding or excessive play caused by worn parts or improper installation is evident. The engine last chance screen was removed and found to be free of dirt, particulate, sand, or other contamination. The main oil filter was removed and evidence of shining, metallic residue was noted. Engine tear down scheduled in the near future.
