Sir,

In late August or early September 2018, I was at Cloud 9 Helicopters at North County Airport located in Palm Beach County Airport. While there I noticed a Cavalon side by side gyro sitting in the corner. I inquired as to its status and was informed that it was an unfinished kit and that the owner/builder had installed one of the control teleflexes improperly. The owner/builder wanted to sell the a/c because he was unhappy how the build turned out.
