

3.2) Before engine start

Carry out pre-flight checks.

3.3) Pre-flight checks

Safety

WARNING

Non-compliance can result in serious injuries or death!

Ignition "OFF". Before moving the propeller. Switch off both ignition circuits and anchor the aircraft. Have the cockpit occupied by a competent person.

WARNING

Risk of burnings and scalds!

Hot engine parts!

Carry out pre-flight checks on the cold or luke warm engine only!

Operating media

Step	Procedure
1	Check for any oil-, coolant- and fuel leaks. If leaks are evident, rectify and repair them before next flight.

Coolant

NOTICE

The coolant specifications of the section [Chapter 2.2\)](#) Operating media are to be observed!

Step	Procedure
1	Verify coolant level in the overflow bottle , replenish as required up to top. The coolant level must be between min. and max. mark.
