

Statement

- At approximately 1805 EST while I was on approximately 3-mile final to runway 14 at KAAF, while at approximately 1,500' MSL, I witnessed a sudden flash and fireball at my left 10:30 for about 3 miles. The fire burned for the rest of my arrival and landing at KAAF.
- Prior to this, while I was at 4-5 nm final, a pilot flying a Centurian announced his intention to take off from runway 06. He wanted to make sure he was clear from me as he took off.
- I did not see his aircraft depart or any part of his flight path. I believe the flash and fireball correlates with his aircraft.
- Please contact me with question at [REDACTED]
