

My name is Chance White, and I
am a Lineman for Centric Aviation at KAAF.
Friday 30 November 2018, the
gentlemen requested a top-off.

I proceeded to top the plane
off, all was well and there
was no issues. He showed
up around 5:30 to depart. He
went straight ~~to~~ to the restroom
and then gone back outside
to unload the courtesy car. He
came back inside and asked what
was East of here. I told him,
not a whole lot, because the MOA
is the opposite way.". He left and
went to his aircraft, as I went
to shut the hangar doors. After

that I proceeded to top off the
JET-A truck at the Fuel Farm. During
this he was doing what I thought
to be a ~~re~~ run-up. He took off
and everything was normal. So I
proceeded with what I was doing, and
Brooke radioed me that a gentleman
had landed and needed Fuel. I told
her I would be finished shortly and
would be on my way. She then informed
that a plane had crashed North of the
Field. I stopped immediately and got everything
back in place at the Fuel Farm. A man
met me at the Fuel truck and told
me what he thought I should do, and
told me he saw him go down.
