Subject: ForeFlight Re: NTSB request on N188CW

Hi Paul,

We didn't deliver a briefing for N188CW around the time of the accident; the last briefing we delivered for it was July 15, 2018, and based on media reports the name associated with the account that requested the briefing in July does not appear to not be associated with the accident.

I looked for accounts under the name of the pilot as identified by media reports: Wei Chen, and found an account that appears to be his. However he had not filed any flight plans using ForeFlight Mobile since August 26, 2018.

The last route entered into the app (with date & time GMT) was:

12/19/2018 20:27:39 KCEW KFTY KNQA

The last Weather Imagery viewed in the app were as follows. NOTE: We do not log the actual weather imagery, so the links by each imagery product point to the ****CURRENT**** version of that imagery being delivered to pilots as the time you click on the link:

12/19/2018 15:58:12 noaa_prog_charts 24 Hour Surface Analysis

12/19/2018 12:48:45 30 HR (Updated at ~1930Z and 0730Z)
<https://cloudfront.foreflight.com/imagery/prod/990df9a7-3d91-4c6a-b793-bc845629ab2a.gif>

We do not log whether the pilot was overlaying a live weather product (such as Radar, or Satellite imagery) over the Maps page in the app.

Please let us know if there's anything else you need for this.

Regards,
