Subject: Plane Crash

Hi Mr. Gerhardt,

I've attached a map screenshot of where I was when the plane crashed (the little red dot is me). As to what I witnessed, I was running along Lower Brush Creek in the direction away from the school, and I saw the plane flying towards me. Then, it looked like it wavered slightly in midair, before veering to the right (my left) and crashing to the ground at a steep angle. I can't recall exactly what it sounded like; from what I remember, it just sounded like a normal airplane. The weather was clear and sunny, with few clouds and no wind.

I hope this helps clear things up.

Townes Ellum
