Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

There was an propeller strike and damage to all three blades. The engine would have to be overhauled. The landing gear collapsed and there is damage to the belly skin. The tail section was damaged when it struck an fence post. The aircraft is not in repairable condition.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On October 3, at approximately 6:00p.m. I prepared my Piper Commachie for flight. I gave my airplane a thorough preflight, which included checking the oil, a good visual inspection under the cowling, checking all the control surfaces, visually checked the fuel quantity and drained fuel from the belly sump. I started the engine and confirmed I had good oil pressure and fuel pressure. I taxied to the runway hold short line and waited for the two crop dusters too clear the active runway, which took aproximately ten minutes. I then back taxied on runway six for departure on runway 24.

I did a runup, on the pull off of runway 24 which included cycling the prop three times and a mag check. I also checked my oil pressure, fuel pressure, alternator and vacuum. I adusted my DG and artifical horizon, confirmed my radio and GPS were set and working properly. Upon completion I started my roll on runway 24. I checked for maximun RPM's and airspeed coming up and rotated at 70mph. I was climbing out at 100mph and between 200' and 300' agl when I had a total loss of power. I was 2/3 the way down the runway, and I elected to land the plane on the available runway. While preparing to land I dropped the gear and touched down on the runway. I don't believe the gear was locked and it collapsed upon touchdown. The aircraft slid to the end of the runway and into the grass. After that the airplane skid over the grass, down an embankment, landed on the road and stopped shortly after impacting a fence post and tearing down a barb wire fence.

I shut down the power and closed off the fuel valve. I was unable to get the door open and I wasn't sure if anyone saw the accident. I didn't smell fuel so I choose to turn on the master and call for help on the local unicom frequency. I contacted a pilot, who I believe was in Warren County and explained my situation. After that a truck pulled up and two gentlemen helped me get the door open. I stayed with my airplane until the ambulance arrived and took me to the hospital.
