

RECORD OF INTERVIEW

Daniel P. Boggs
Air Safety Investigator
National Transportation Safety Board
Office of Aviation Safety - Eastern Region

Date: January 29, 2019 @ 0830 EDT
Person Interviewed: Edgar Dubon - CFI
NTSB Case Number: ERA19LA079

Narrative:

Mr. Edgar Dubon was interviewed by telephone.

Mr. Dubon stated they were flying along the shoreline at 800 ft. the engine started to vibrate and then shut down. Edgar tried to restart the engine twice and it would not restart. He set up for an emergency landing on the beach. at 200 ft. he saw a peer and tried to restart the engine again so he could fly over top of the peer. The engine restarted but would only get to 1200 RPM. He flew over the peer and saw people on the beach so he decided to land in the ocean close to the beach. as soon as the main gear touched the water. The airplane flipped over. All four occupants egressed the airplane and there were no injuries.
