Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

AIRCRAFT WAS DITCHED IN THE OCEAN. UPON IMPACT THE LEFT WING SEPARATED FROM THE AIRCRAFT AND THE FUSELAGE WAS DAMAGED. THE AIRCRAFT SANK AND THE LEFT WING WASHED ASHORE AND WAS RETRIEVED. NO OTHER PROPERTY WAS DAMAGED.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Please be advised that this narrative is from the surviving First Officer Rolland Silva given to Director of Operations, Mr. Watson Felts at approximately 68 hours post accident on Monday, Feb. 11th, 2019 at approximately 8:30 am (est). F/O Silva was still in the Ryder Trauma Center at Jackson Memorial Hospital and under medication. Mr. Thomas Cooper, President of Conquest Air, was also present during the meeting.

Prior to departing on the first trip of the day for N145GT (OPF-NAS flight 503) on Friday morning, the preflight and run up of aircraft was good. They departed OPF at approximately 9:03 a.m. (est) with a normal takeoff and climb out. They leveled at cruise and the left engine remained at 2400 RPM. Captain Hopkins elected to continue at 2400 RPM and 30" MP on both engines. The aircraft landed safely at NAS at approximately 10:04 a.m.(est) and the cargo was unloaded.

First Officer Silva remembers discussing the engine issue in NAS with Captain Hopkins and he attempted to text the Director of Maintenance, Mr. Carlos Gomez, however, the text did not go through. After the unloading was complete, they started both engines, tested the props and they were satisfactory.

Flight 504 took off from NAS at approximately 11:13 a.m. (est) with IFR clearance with First Officer Silva as the flying pilot using dry power setting. During the climb out, Captain Hopkins could not set the RPM on the left engine which was stuck at 2700 RPM. Captain Hopkins cancelled IFR and told First Officer Silva to head for IZROZ at 4,500 feet. Captain Hopkins attempted to troubleshoot the issue with no success. Captain Hopkins decided to continue with prop turning and power low to baby the engine. First Officer Silva noted that Brake Mean Effective Pressure (BMEP) was at the bottom of the scale, however, he did not remember what the actual RPM was. First Officer Silva suggested to Captain Hopkins that they should return to NAS to which Captain Hopkins replied that he had dealt with this sort of problem prior and it could be fixed at OPF upon return.

First Officer Silva remembers that when they were crossing Bimini, Bahamas, Captain Hopkins called for the approach checklist and boost pumps were activated. After passing Bimini, Captain Hopkins expressed concern over fuel imbalance, that the right wing would be light. Captain Hopkins requested First Officer Silva to look up fuel transfer in the checklist. First Officer Silva does not remember if Captain Hopkins touched any fuel valves while First Officer Silva was looking at the checklist. First Officer Silva determined the quick reference handbook (QRH) did not have anything and at that time the right engine started losing power. Captain Hopkins called to feather the right engine, which First Officer Silva accomplished. Captain Hopkins did not want the engine secured in case they might need it later, so he set it to idle cutoff (ICO) and closed the cowl flaps. Captain Hopkins slowly advanced the throttle on the left engine and shortly thereafter the left engine started surging. Captain Hopkins tried to keep the left engine going and asked First Officer Silva to try and restart the right engine. Neither engine responded. First Officer Silva called May Day right before ditching.

As a result of the impact, First Officer Silva indicated that the tail section broke off. First Officer Silva tried to help Captain Hopkins, however, with the water rushing in, he was unable to pull him out. He was able to make it out of the rear of the aircraft with the inflatable raft and was subsequently picked up by the Coast Guard. Captain Hopkins did not make it out of the aircraft. The Coast Guard airlifted First Officer Silva to OPF where he was transferred and airlifted to Ryder Trauma Center at Jackson Memorial Hospital.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

AT THE FIRST SIGN OF A MECHANICAL MALFUNCTION THE CREW SHOULD HAVE LANDED AS SOON AS PRACTICABLE.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

According to report from surviving First Officer, both engines failed (see previous information on engines on Page 3).
