Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

1. Right main gear torn from aircraft.
2. Right wing skin inboard of fuel tank cut open from street sign from leading edge to main spar which also broke the fuel line loose from the tank fitting causing a fuel leak at the resting point of the aircraft.
3. Leading edge damage on right wing outboard of fuel tank.
4. Nose gear strut was sheared off at the base of the strut housing.
5. Wind screen broken from striking road signs.
6. Prop bent from striking ground.
7. Stabilator damage on left stabilator side outboard.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On final for runway 12L, engine roughness, checked engine gauges-all green. Told tower about power loss and that emergency landing would happen. RPM's went below 1400 rpm, retracted flaps to zero. About 5-600 feet on final, engine quit, but couldn't make it to runway 12L, chose the road next to the jail. Went direct to the road. Landed zero flaps, avoided power lines, wanted to avoid the power station at the end and applied right rudder, which turned aircraft into the bushes. After stopping, contacted tower to say he was on ground, then secured the aircraft and turned off the fuel selector.

RECOMMENDATION (How could this accident/incident have been prevented?)
