Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft damaged aerial power line and was destroyed

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On April 7 aircraft topped off with fuel at KPOU, flown to KHPN, then KMMK and dropped off for maintenance.

Alternator belt was tightened and an additional support bracket added.

On April 11 aircraft was picked up. Normal preflight performed. Fuel sumped clean and was just above the tabs both wings.

Boarded aircraft and went down preflight checklist. Engine started right up and ran smooth. Let it warm up for a few minutes.

Mags checked smooth on run up. All gauges shown correct. Set nav to OBS mode and Aspen to runway heading. Listened to the KMMK ASOS and set barometer. Did control surface check. Taxied to hold short runway 18, annouced takeoff, and that we were staying in the pattern.

At ~6:50pm set mixture full rich, set prop full forward, turned on electric fuel pump, taxied on to runway 18, took off, and raised the gear.

At 600msl turned crosswind and contiued climb. Leveled off at 1100msl, reduced manifold pressure to 21, pulled prop back to 2400rpm, turned downwind, lowered the gear and put in first notch of flaps. Extened the downwind a little to allow more time for a Warrior that was landing. Reduced mainfold presssure to 15, put in second notch of flaps, turned base, and began decent to 600msl.

At 600msl were short of final so, leveled off and attempted increase manifod pressure to 21. Felt no power increase and saw engine at 2000rpm and dropping. Tried a quick engine restart by putting controls in hot start config with the prop spinning. Turned towards the runway and looked for an alternate place to land. Saw an empty ballfield ahead and to the right. Directly ahead was a row of trees. Airspeed was already down to ~80kias. Didn't think we'd make it over the trees so, turned right towards the ball field and began to desend while turning. To give max distance to land, was going to slip it hard once lined up and add 3rd notch of flaps. While in the turn the aircraft hit the power lines and dropped.

We were both concious after airplane hit the ground and exited as fast as we could through the open right side. Alex took a few steps away from the plane and layed down on the grass. I sat on the wing and gatherd personal effects from the aircraft. Police and rescue arrived and tended to Alex. A power line was in contact with the plane so, I was told not to move. I remained there for a time until it was declared safe. The recsue workers helped me off the wing and on to a gurney. I was taken by ambulance to a nearby hospital.
