Statement of aircraft accident from Michael W. Spaulding Aircraft: N395AE

The base received a flight request at approximately 03:32hrs. This was a transfer flight request from Navicent/Macon in Macon, Ga to Augusta Doctors Hospital in Augusta, GA. I filed a Balwin Risk assessment for the flight. It was acknowledged by Cencom at approximately 03:36hrs and the crew proceeded to the aircraft. After conducting a crew walkaround as per the GOM I entered the cockpit and put on my helmet for engine start. The pre-start checklist was completed and I confirmed the four mandatory items before starting the aircraft. The engine start was normal and the medical crew was given the signal that it was safe to proceed under the turning rotor disc and conduct their walk around after engine start and it was also safe to enter the aircraft. Both crew members announced over the intercom that they were ready left and right. I then completed/confirmed the pre-takeoff checklist as well as the challenge and response checklist. I applied power and came to a hover and then proceeded to turn the aircraft into the wind to conduct an altitude over airspeed takeoff. I completed a power check with a torque reading of 74.8%. I then used about 86% torque to accomplish the altitude over airspeed takeoff to clear the obstacles. As I started to accelerate forward and gain climb out airspeed a loud report was heard from the engine deck area followed by an announcement/question from the flight nurse "What was that Bang?". I then heard a clicking noise that sounded like paper on fan blades. The aircraft immediately started a rapid descent to the ground. The aircraft hit the ground, bounced and translated to the right referencing the direction of travel and came to rest upright. I then rolled the throttle to idle to start an engine shut down. Fearing a post-crash fire I then shut the fuel valve off out of sequence and at about 30NR and with prompting by the flight Nurse, applied the rotor brake. After the rotor stopped the crew exited the aircraft. I, as the pilot in command, notified the Cencom, Maintenance Control, and Operational Control Center of our status. I had mounted my Night Vision goggles but because of the direction of takeoff, and I was facing a half moon and knowing the potential for blooming and wash out I used my discretion to leave the goggles in the unright non-use position. The wind was out the west at approximately 8 to 10kts hence the reason the turn into the wind after coming to a hover over the helipad.
