Dear Mr. Basilotto,

As per your request here is my statement regarding the incident at VAY on 3/9/2019

After an uneventful flight with my son, we landed on runway 26 at VAY Airport.

As soon as I started to apply the brakes, the seatback collapsed, and position me out of site of the runway. When I recovered, the airplane was moving to the left, departed the runway and subsequently collided with the segmented circle located there.

Please let me know if I can answer any further questions.

Yours respectfully,

Pieter van Ham.
