SUBJECT

N404PE

DIGEST

I called Mr. Geisler for his statement.

Mr. Geisler stated that he was the passenger for the flight. The pilot and Mr. Geisler had been making that trip for approximately 4.5 years. He stated that ATC gave them a vector 30 degrees to the right. A short time later they penetrated the clouds and it became very rough and at some point he didn't know which way they were facing and the aircraft stalled because of the weather. He also stated that when they came out of the clouds they were in a spin and the pilot pulled the chute.

After they touched down on the mountain they exited the aircraft and started up the mountain and were met by park rangers and taken to the hospital.
