Email Report

The Vehicle Recorder Division received two LXNAV LX7000 Pro IGC devices (s/n 20231 and s/n 20224). The devices arrived undamaged and were powered on normally. According to the manufacturer, the attached screen of the front unit (LX7000 Pro IGC Logbook.jpg) showing the "Logbook" indicated historical data were not present. The rear unit indicated it was in a configuration acting as a repeater, thus no accident-related data were recovered.
