

Bradley Myers

CFI TriState Aviation

Bradley Meyer - CFI

On September 24th 2019 I was flying with a student coming back to 47N from KTTN and noticed an airplane heading down towards the trees. About 1 mile to the south of 47N my student and I heard a call from N78192 that they were on base to final runway 25 and were experiencing engine troubles. The student called out they are going into the trees and about 5 seconds later he got on the radio and called out they are okay and unharmed. Once that call was made my student and I began circling over the aircraft in the trees and I began making frequent transmission to the student calming him down and getting an assessment of the situation. We circled over top for about 30 min relaying messages to Tri State Aviation and the New Jersey State Police helicopter N1NJ. Once the state police arrived I broke off the circling and landed runway 7 at 47N.
