

MEMORANDUM FOR RECORD

Lynn Spencer
Air Safety Investigator
Eastern Region Aviation

October 1, 2019

Subject: ERA19LA286 Dalton, GA
Name: Greg Bates, Whitfield County Coroner

Mr. Greg Bates explained that no toxicology or autopsy was performed on Mr. Michael Green. He stated that, the evening of the accident, his office attempted to find out the appropriate course of action from the FAA but could not get any answers. When they called the FAA, they were advised that the FAA was speaking to the NTSB but that there had not been a determination made as to what kind of aircraft this was or whether anyone would be investigating this accident. Mr. Bates said that, "It took a long time for anyone to decide if they were going to get involved," so he ultimately did his job and recovered and released the deceased, who was then embalmed.
