NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took on fuel (full top off) and, when finished, departed KFPR at approximately 1 PM on 2/28/19 with a destination of MYBG (1:15 flight). I obtained ATIS at KFPR, taxi clearance and take off clearance, runway 14, flying runway heading. At the coastline I was switched to Palm Beach Approach. I contacted Palm Beach, obtained flight following, on course clearance and climbed to 3500'. I leveled off and continued my flight. About 10-15 minutes later Palm Beach handed me off to Miami Center. I checked in, and asked for a final cruise altitude of 7500', which Miami approved. I started my ascent and got about 3700' and my engine sputtered and I lost immediate power. I switched on the boost pump, activated carb heat, with no change, and switched fuel tanks, and then the engine stopped. I was in constant communication with Miami appraising them of my situation. I set up glide speed at about 80 Kts and turned west into the wind. I was descending at about 4-500' per minute and at about 50' above the water I opened the front door, employed full flaps, trimmed the plane all the way up and pulled the yoke back in an attempt to drag the tail in the water, which I did. This slowed me even more and when the wheels touched water the plane abruptly stopped. I grabbed my raft and backpack, stepped onto the wing and inflated my life vest and raft. I entered the raft and watched as the plane sank nose first.
