

MEMORANDUM FOR RECORD

FAA Inspector Statement

Peter Wentz
Air Safety Investigator
Eastern Region Aviation

NTSB Accident Number: ERA19LA277

FAA Inspector Maitely Santiago

Date: September 26, 2019

Narrative:

I received a phone call from FAA inspector Maitely Santiago stating that they inspected the airplane wreckage on September 23, 2019. They found the fuel selector in the off position with visible fuel in the right tank and no fuel in the left breached tank. The primary and secondary flight controls were attached or within close proximity to the airplane. They confirm continuity for pitch and roll to the cockpit controls. Inspector Santiago proved photographs of the accident airplane.
