Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike with bent prop. Nose wheel and Right main torn off, Left main barely attached. Right flap torn off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I planned to fly to KSUS. I watched the weather closely the night before. I talked to my instructor and another pilot to get their advice on the flight. I woke up early and decided to not proceed to KSUS because of low level icing conditions in the St Louis area. I decided to fly to KUCY and drive from Union City to St Louis. Conditions were forecasted VFR for the entire flight.

I left M02 VFR. The winds were 250 att 11 knots. We flew at an altitude of 2500 feet. We were landing at KUCY at 0700. I checked the AWOS about 8 miles out and the winds were 270 14-24. I entered the pattern on a left base utilizing the obs function to aide with lining up with centerline. I decided to come in high to keep my airspeed up. I had 1 red and 3 white on short final. About 100 feet AGL, I changed from a crab to a right wing low and left rudder position.

Winds were 270 at 14-24 kts. I was full flaps and attempted to keep my speed up for the gust correction. I was about 85 knots. I normally approach at 77 knots in this airplane. About 30 feet AGL, we sustained a really strong gust. I lost significant airspeed and wonder now if the gust came from the NW. The gust was strong enough that it blew me off centerline. I attempted to correct, but a second gust blew us up into a 45 degree left bank angle. At that point, I tried to go around, but we had rotated to an approximate heading of 145. I had wind on my tail and could not climb. I then made contact with the graound and stopped in the grass. The ground was wet and soft from recent rain. There was 3 inches of water on the ground.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

First of all, I could have never flown on that morning. I also could have landed at 1M7 which is 10 miles to the north and has a 9/27 runway.
