Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right wing tip cosmetic damage, Right skin to and bottom outboard of outboard aileron hinge, and one inch upward bend in aft spar starting at outboard aileron hinge

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Practicing landings in the traffic pattern at KMHT. On the fourth attempted stop and go, with a left crosswind correction applied, the aircraft bounced off the left main mount, and the left wing came up with the right main mount contacting the runway. The aircraft then veered left, and the right wing scraped the runway. The aircraft came to a stop heading approximately 170.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I speculate that if, after the initial runway contact, I had initiated a go round, would the mishap be averted. The aircraft has remarkable slow speed performance, however, at that point I cannot be certain there would have been enough control authority to fly safely.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
