A. McCarterDate Report Received
07-29-2020

Thursday July 16th. 2020, I linked up with a buddy to go flying and see the sights. I performed my preflight, checked my fuel once I completed the checklist and conducted my run-up, I took to the air. I took off on runway 30 at Deland Airport and headed straight out to the west northwest toward Lake Woodruff. I was showing my buddy the sights and explained how to read the lake. As far as how to tell wind direction and such. I flew out towards lake Dexter. I was conducting my water landing checklist when we spotted some alligators. In the lake. I told him we see Manatees out here also. I can only say I allowed the conversation to distract my attention from the landing gear. I came around and lined up to come down over and land as I have done over a hundred times before. I put in flaps and began my landing on the water. I felt the plane start skimming across the top of the water, I even said "we are on the water." All of sudden the plane nose began to dig into the water and then we were under water. I reached over to get my buddy unbuckled from the seatbelts and then get out of the water. When I finally came up out of the water, I started yelling for my buddy, He replied he was ok. That is when I saw the gear sticking straight up and I than realized I failed to reposition the gear for water landing. A passerby in a boat took us to the shore and we went to the hospital.

This is my account of the flight that took place on Thursday July 16, 2020.

I have one hundred forty-one and a half (141.5) flying hours in N86KD
