Subject: 10/04/19 Small aircraft incident Randolph County NC

On 10/04/19 I was attending a football game at Southwest Randolph High school in Randolph County NC. My wife and I serve the team Gatorade at halftime of the games and we were on the practice field setting this up, the time was approx. 18:30 to 18:57. We heard a small aircraft approaching from the Asheboro area and this is nothing unusual from the location of the school to the Asheboro airport. I looked up at the aircraft when I heard it turn to circle and he was getting lower and the plane flew across the football field and departed the area on what I believe to be on a southwest heading. I then went back to preparing the Gatorade just thinking it was going to the airport. While I was doing this I heard the engine on the aircraft rev up off in the distance like it was turning to come back and I looked up but did not see the aircraft just thought it must be turning back towards the airport. On 10/05/19 I went to Asheboro Fire Department Station 1, because I was doing the 10k Fall Festival run. When I arrived the personnel on shift asked me if I had heard about a missing aircraft that was missing in the area. While we were discussing it they stated that while they doing an EMS stand-by at the Asheboro High School football game that a small aircraft had circled the field during that game and departed the area headed towards the Asheboro airport area and we was both wondering if this could be the aircraft that was missing.

Sincerely,

Eddie Cockman
Deputy Chief
Asheboro Fire Department
