N4385K Pilot: Bob Bicksler 10/4/19

I planned a flight from KROC to KMDT on October 4, 2019. I filed an IFR flight plan and checked the weather on fltplan.com that estimated 59 minutes for the flight and estimated 22 gallons of fuel burned. I also checked the weather on ForeFlight prior to departure.

I arrived at the AvFlight FBO around 1530 and ordered 30 gallons of 100LL to be added to the 47 gallons already onboard for a total of 77 gallons. I watched the line crew fuel the plane and conducted a thorough preflight. I did not note any abnormalities.

With one passenger, I departed from KROC for the flight to KMDT around 1600 on Friday, October 4. I received an initial altitude clearance of 10,000' and was subsequently cleared to 12,000' as my final altitude.

The flight was unremarkable until I turned to intercept the final approach course for runway 31. The controller had me on an extended right downwind for runway 31 and subsequently issued a right turn back toward the field. I called the field in sight and the controller issued a "cleared for the visual approach to runway 31" and instructed me to contact the tower. I immediately contacted the tower and was issued a landing clearance for runway 31.

I had the ILS loaded and was tracking the final approach course and glide slope as I dropped the gear. I added the first notch of flaps and the engine cut out. I pitched for best glide speed as I tried to restart the engine, advanced the power, and switched fuel tanks, none of which worked. We were losing altitude quickly. I retracted the gear and prepared for a water landing. I advised the tower that we were not going to make the runway. I would estimate that we touched down 1-2 miles from the runway.

After stopping in the water, I moved to the aft section of the plane, opened the top of the clamshell door and stepped onto the wing. I then assisted my passenger in stepping onto the wing.
