

On 16 Oct 2019 I saw a group walking to their plane led by their pilot. Before they got on the plane a Global Express in front and to the left of their plane powered up excessively and knocked two of them to the ground. I saw one of the ladies blown all the way to the ground and not move. I got on the radio and called for the front desk to call the fire department and went outside to let their pilot know the fire department was on the way.
