Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Both props were severely damaged, engines were damaged due to the prop strikes, sheet metal damage to the belly, under the wings, and a hole in the fuselage just below the front baggage compartment.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The incident occurred around 10:30 am eastern time on 11-09-2019. I had already flown four other flights that morning as part of a Patient Appreciation Day celebration at the Griffin airport. I was taking the Colwell family for a flight, and had the father in the front right seat, the mother and son in the middle row of seats, and the two daughters in the rear row of seats. After running through the before takeoff checklist I applied full power to take off on runway 14. Engine instruments were indicating normally and the airspeed came alive, but at about 70 knots suddenly the landing gear retracted. The airplane started sliding on its belly and I could see that the props were stopped and bent, so I thought the gear had collapsed. The airplane stopped half on the runway and half on the grass. As it stopped I shut off the fuel to both engines, turned off the master switch, and both mags. I opened the right door to let the father, mother, and son out, and we climbed down the wing to let the two daughters out through the rear baggage door. We quickly moved away from the airplane in case a fire started, which it did not. The passengers were great as they did exactly as I instructed and did not panic. Many people witnessed the incident and called 911. The police and fire department arrived quickly. At this point I looked back in the cockpit and noticed the landing gear handle was in the up position. I did not put it there so somehow it either got bumped as passengers entered the airplane or it moved up on its own. I had a previous incident almost two years ago where I put the gear handle down in preparation for a landing, but the handle kept popping back up and wouldn't stay down. I held it down and pulled out the circuit breaker for the landing gear motor so the landing gear would stay down. I had it repaired on 01/19/2018. I haven't had a problem since, but it did occur to me that maybe that happened during takeoff and I didn't notice it. I know the baron has a "squat" switch that prevents the landing gear from retracting when there is weight on the gear, but the runway was somewhat bumpy and I believe the gear extended enough to open the switch and allow the gear to retract. Again, I am certain that I did not raise the landing gear handle.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I would recommend add to the before takeoff checklist to visually check that the landing gear handle is in the down position. I know I will always visually check the gear switch everytime I apply power for takeoff from now on!

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I believe the landing gear handle either spontaneously moved up or it was bumped as passengers entered the aircraft. I know the gear switch has to be pulled out first then moved up, but possibly it didn't "lock in" completely when I landed previously that morning.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

1. The reason the ELT didn't activate is that there wasn't enough impact .
2. The fifth passenger was Kara N Colwell who was seated in one of the third row seats. She had a lap only seat belt, and was not injured. She is over 5 years old.
