

4-24-2020

I was standing in my driveway and heard a loud noise coming up the river. I looked thinking it was an airboat. As it approached, I noticed it was a small airplane having trouble. As the plane approached the Fowl River bridge on Hwy 188 the engine suddenly stopped and the plane went down. It hit the power lines as it fell. I called 911 at this time and went to the site to see if I could help.
