

LST Statement

On April 24th 2020 at about 1445 local time, YV3427 requested Jet A fuel with FSII my coworker had just arrived with the fuel truck. We began connecting our bonding connection and the single point hose to begin fueling, we doubled checked with the PIC that he needed 480, he then requested 490. Upon reaching 480 the guy came out and stopped us at 485. We then removed our equipment, my coworker wrote the ticket then obtained signature from the PIC confirming 485 gallons with FSII was pumped into the airplane. My coworker then left to park the truck.

Albert Rolle

A black rectangular redaction box covers the signature of Albert Rolle. A faint, handwritten mark is visible above the box.
