

Plane accident July 1,2020
Leeward Air Ranch Ocala,Fl

I saw the plane coming in for a landing at the north end of the ranch.

The plane seemed to be a little higher than most planes coming in for a landing. I turned right on the road (Leeward Air Ranch Circle) that is on the North end of the runway to get to the other side. I was still watching the plane as I was about midway across and saw the plane touch down in the middle of the runway but quite a way down the runway. The plane bounced up and then came back down but bounced even higher a second time and as it went back down it banked to the left and slowly went out of my sight on the left side of the runway.

This is what I saw that day.
James Asbury

A black rectangular redaction box covering the signature of James Asbury. There are some faint, illegible handwritten marks above and below the box.
