

Michael Risner

9/23/20

Student Pilot

I was turning right downwind for runway one and I was glancing down at Mr Randy as he was spraying. It looked to me like he pitched up to clear something and then abruptly went down and that's when I lost sight of him. I am new to flying so I was concentrating on a bunch of different things at once, and then panicked when I saw that. I called my instructor on the radio (he was also in the air, but in another airplane and with a different student) to tell him that I did not see Mr Randy any more and there was a fire with a lot of smoke. He informed me to land the plane and to taxi to the FBO. When I got to the FBO, I got the eagle vista employees to call emergency and Mrs. Beverly.
