Greetings,

The airplane has substantial damage to the wings, the horizontal stabilizers from tree impact, the landing gear, the right wing strut sheared at the wing attach point and the distortion is indicated aft of the spar from root wingtip, the fuselage at the bulkhead aft of baggage has significant distortion.. and it is still hanging in the trees and was not safe to try and move...

Jeremy saw what we could and he took lots of pictures while I held brush back etc.

I will be on duty tomorrow after 12:30pm, and will be working with Jeremy and the rest of the team to sort out items needed.

Jerry L Toms
