I never got a good view as I was taken to the hospital. I do know the left wing was torn off. And the tail was missing and the fuselage was gone. The plane was upside down. There was no way to tell how that I slid into.

Subject: Aircraft Accident at Lancaster Airport 11/19/20

I in my airplane and a friend in his airplane flew to Lancaster Airport for Dinner around 5:30. It was a night flight. We finished dinner around 7:15. I has only water to drink. We talked to Ground Control around 7:30 and were assigned Runway 13. My friend was ahead of me an lined up and the hold point. He was cleared for departure and I moved up to the hold line and was Cleared by the tower for take off. I moved forward toward Runway 13 mistook the white line on the taxiway for the runway center line and neglected to look for the Runway Numbers. After going to full power and moving down the taxiway and about to lift off, I spotted two huge white gas tanks. I knew whatever, I had to miss those tanks, so I turned the plane right as hard as I could. I then heard a loud noise, and maybe a second later a tremendous noise, then silence. I noticed a spark above the radio panel and turned off the power. It took a second or two to realize I was upside down. I waited for little time thinking someone would get me out as I seem to be blocked from moving. After some time I decided I had to somehow get out of the plane and find help. I think it was the window in the right door I got out. I had a flashlight and kept trying to get the attention of any passing vehicles. Finally a fire truck noticed and they came with medical care, I was to Lancaster Hospital.
