

MEMORANDUM OF CONVERSATION

Aaron McCarter
Air Safety Investigator
Eastern Region Aviation

Date: 12-05-2020
Person Contacted: Pilot; Bob Alfieri
NTSB Accident Number: ERA21LA057

Narrative:

Discussed the circumstances leading up to the accident.

He is a student pilot. He knew there was a crosswind and thinks he over corrected before the takeoff even started, and once the airplane started veering left, he didn't correct with enough aileron or rudder. Once control was lost, he attempted to pull the power and use the brakes, but the airplane continued into the grass, across a ditch and struck a hill.

He confirmed that there was no mechanical malfunction or failure that would have precluded normal operation.

Brief discussion about completing the 6120 accident report.
