

MEMORANDUM OF RECORD

Eric Alleyne
Air Safety Investigator
National Transportation Safety Board
Office of Aviation Safety - Eastern
Region

Pilot: Jeffrey D. Stalk

Place: Bunn, NC

Interview Date: 12/27/2020

Subject: Accident event
correspondence

In a telephone conference with Mr. Stalk (pilot), he said that this was the second flight in his glider. He said that the takeoff was normal and the glider was released at 3,000 ft. agl. Mr. Stalk stated that he was just soaring around and as he lost thermals the glider began to descend. When he looked at the altitude, the glider descended to approximately 1,700 ft. agl. Mr. Stalk started to look for the airport but did not see it. He decided to land in a field. He remembers the approach to the field but doesn't remember anything after that.
