

RECORD OF INTERVIEW

Daniel P. Boggs
Air Safety Investigator
National Transportation Safety Board
Office of Aviation Safety - Eastern Region

Date: 1/26/2021 @ 1130 EDT
Person Interviewed- Paul Burnett – copilot
NTSB Case Number: ERA21LA112

Narrative:

Mr. Paul Burnett was interviewed by telephone.

Mr. Burnett stated the same flight story as Ms. Eaton. Flying at 250 feet above ground level when the engine made a “weird noise” and rolled back to idle. Tried all the emergency procedures on boost pump, switched tanks, and pumped the throttle with no help. They landed in a field and ripped the nose gear off and slid into some trees. They egressed out the door and noticed fuel pouring out of the cowling.
