NOTAMS (D and FDC), AIRMETs, SIGMETs, PIREPs in effect at the time of the accident/incident:

Clear skies with light and variable winds of 3 to 4 knots and no known turbulence.

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Substantial damage to left wing and landing gear. Minor damage to right wing and rear right window.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Checked weather for destination and AWOS for current location frequency 118.675. Fueled up airplane, checked oil and added 1/2 quart and checked fuel sumps for particles. Then completed a thorough pre-flight inspection of the Taylorcraft BC-65. Applied brakes, chocked wheels and propped plane. While warming I entered aircraft, cut on radio, rechecking AWOS, checked radio and headset for full functionality. Pulled chocks and released brakes then called for taxiing to runway 31. After engine warmed to over 130 degrees I performed a run-up to 1700 rpms and checked right and left mags both with minor drops as usual and checked the carb heat which dropped slightly as well. Called over the radio for departure from runway 31. I remained in the pattern and departed on the left downwind to the north towards KCDN Camden/Woodward Field Airport for the purpose of training and building solo flight time.

After leaving the vail of Metro Airport in Columbia I climbed from 1500 feet to 2100 feet to be above the antennas in front of me, with engine rpms of 2500. At this point I experienced a sudden power loss where the engine felt as though it was trying to quit running. It felt that some sort of mechanical failure was quickly happening preventing it from making sufficient power to hold altitude. Where later a police officer stated that a witness saw me flying alarmingly low with black smoke coming out of the tailpipes. I applied carb heat which was no help and only made for a greater loss of much needed rpms. At this point I turned around hoping to either make it back to the KCUB airport or possibly have to land at the golf course I had just passed. Within just few seconds I quickly realized that I could not make it back to the airport I had left from and the golf course was covered with people. The only other possibility for safe landing was a neighborhood being developed with no houses there as of yet. I was very low at this point and barely made it over the tree line, where I glided in to a near stall speed and was able to land where the building pads were located and noticed they were terraced 3' or so between each plot, every 30 feet or so. The road in the center of the lots was curved and had grading equipment along the sides at different points.

I touched down, bounced and made my way to the edge of the road where I applied right rudder to turn, but felt an impact to my left wing tip that spun the plane around and hit the tractor behind it where the tongue of its trailer went through my rear right window and almost impacted me and was stopped suddenly.

I then noticed gasoline running down the outside of my left window and the left wing was severed. I cut the power to the mags, pulled the full shut off switch and exited the plane as fast as possible. From the time of noticing the sudden power loss to landing the aircraft was all within a couple of minutes. But I landed the plane with no injuries to other people, myself or any property other than the plane thanks to all the power off landing training and my instructor.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Considering the sudden loss of power and the surroundings, I do not currently know what I could have done differently and still not caused harm to myself or others.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
 (If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Do not know the exact cause of the malfunction.
