

MEMORANDUM FOR RECORD

Douglass Brazy
Air Safety Investigator
Eastern Region Aviation

March 1, 2021

Subject: NTSB investigation ERA21LA141, N670BS, experimental amateur built Lancair 320, Atlantic Ocean, February 24, 2021. Information provided by the Federal Aviation Administration (FAA).

The FAA provided the following information in an email on March 1, 2021:

The pilot's most recent valid medical certificate / Special Issuance had expired in 2001. He was issued a third class medical certificate in July 2010, however that certificate was revoked March, 2011 after the FAA had determined the pilot failed to disclose disqualifying conditions during the July 2010 medical examination. Those conditions included a history of angina pectoris, coronary artery disease, and angioplasty.

The FAA revoked the pilot's commercial (and private) airman certificates in February 2015, for having previously operated an airplane with no valid medical certificate, as well as previously having violated a temporary flight restriction.
