03/30/2021

On March 30th 2021 I traveled to the Blairstown, NJ airport (1N7) with plans to fly my recently purchased Cessna 150 to Sussex airport (KFWN). The plane had recently passed its annual inspection.

Prior to the flight on March 30th I ran the plane and preflighted it on Saturday the 27th of March, so I would be confident all was in order for the planned March 30th flight.

Upon review of the airplane status and condition for flight I found all to be satisfactory. Using a " Gats Jar " for fuel sampling I found the main sump gascolator to contain only what appeared to be 100LL fuel as blue in color and no trace of water. The same was found in the sample removed from the right fuel tank 100LL and no water. However on the initial sumping of the left tank sump water was detected. I sampled the left tank many times I would say 4-5 times until I was satisfied that no water remained. The total water removed from the multiple sump drainings of the left tank is estimated at no more than 1 tablespoon.

After the preflight was complete I taxied from the tie down to the North end of the hangar ramp where I conducted an extended run up and ran the engine at full takeoff power while holding the brakes. The engine made the expected full power. I kept the engine at full power for 1-2 minutes. I then texted my wife letting her know I was departing in approximately 10 minutes and expected time of arrival at Sussex airport. I also explained in my text that the plane was running great and that I only had 1 tablespoon of water in the left tank.

I then taxied to the hold short line for runway 25. I did one more complete engine run up before calling on the Unicom for departure. I taxied into position and departed runway 25. Climbout was fine the engine made good power. I proceeded on course to Sussex. After having traveled approximately 5 miles enroute the engine stumbled and was surging. I attempted to keep it running but eventually the engine quit entirely. I scanned all possible places for a power off forced landing and found the most suitable location and continued for it. I touched down and upon rollout hit a small grouping of trees where the plane came to rest.
