

RECORD OF INTERVIEW

Daniel P. Boggs
Air Safety Investigator
National Transportation Safety Board
Office of Aviation Safety - Eastern Region

Date: 5/10/2021 @ 1000 EST
Person Interviewed- Elaine Jarvis – Student Pilot
NTSB Case Number: ERA21LA164

Narrative:

Mrs. Elaine Jarvis was interviewed by telephone.

Mrs. Jarvis stated there were no mechanical problems with the airplane, she was on her solo flight practicing soft field and short field landings. She made 5 uneventful short field landings and was going to make a soft field landing. During approach, she noticed the airplane moving to the left and during touchdown she applied right aileron and the airplane turned right and then back hard to the left. She made the decision to go-around, but the nose wheel was not straight when she applied power and the airplane went down a row of hangars and she crashed into the side of one hangar.
