NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On final at 500 fpm descent rate I noticed the descent rate increasing and I wasn't going to land at the point I was aiming for. I went to add power but it was too late.

The left main gear impacted the runway curb. The runway is not level with the ground at the approach end of 24

I bounced up a little and when I touched down things looked OK.

The left wing started to slowly drop toward the runway.

I attempted to keep it on the center line but was pulled to the left.

We parted the runway into the grass and the it appeared that was the point were the left main gear completely collapsed.

The plane continued to turn left finally rotating in place almost 180 degrees and came to rest.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Great attention to sink rate at the last 300' to the runway
